* 1 The Color Code Numbering (CCN) system indicates the positioning in the curriculum structure and the level in light of educational goals, through a numeric code CCN and by color.

As indicated below, the first digit indicates differences in the positioning of the course and the content level.

- 0 White Core courses that do not fall into any specific order in relation to other courses, and certified courses through units that have already been earned or transfer of credits, etc.
- 1 Sakura Courses in the curriculum structure that are best to take first, from the standpoint of the overall order of study. Or, courses that do not fall into any specific order in relation to other offered courses, but for which the difficulty of the content or the targets of learning are set at a relatively low level.
- 2 Lime Courses in the curriculum structure that are best to take after color code Sakura courses, from the standpoint of the overall order of study. Or, courses that do not fall into any specific order in relation to other offered courses, but for which the difficulty of the content or the targets of learning are set at a somewhat high level.
- 3 Carmine Courses that are best to take after color code Lime courses, from the standpoint of the overall order of study. Or, courses that can be taken if the student has surpassed a set grade point level in Lime courses. Or, courses that do not fall into any specific order in relation to other offered courses, but for which the difficulty of the content or the targets of learning are set at a high level.
- 4 Ivory Courses related to teacher, etc., qualification.

□ Course registrants include non-regular students (non-degree students, special auditing students, and Japanese Studies students). However, auditing students are excluded.

* 1 The Color Code Numbering (CCN) system indicates the positioning in the curriculum structure and the level in light of educational goals, through a numeric code CCN and by color. As indicated below, the first digit indicates differences in the positioning of the course and the content level.

- 0 White Core courses that do not fall into any specific order in relation to other courses, and certified courses through units that have already been earned or transfer of credits, etc.
- 1 Sakura Courses in the curriculum structure that are best to take first, from the standpoint of the overall order of study. Or, courses that do not fall into any specific order in relation to other offered courses, but for which the difficulty of the content or the targets of learning are set at a relatively low level.
- 2 Lime Courses in the curriculum structure that are best to take after color code Sakura courses, from the standpoint of the overall order of study. Or, courses that do not fall into any specific order in relation to other offered courses, but for which the difficulty of the content or the targets of learning are set at a somewhat high level.
- 3 Carmine Courses that are best to take after color code Lime courses, from the standpoint of the overall order of study. Or, courses that can be taken if the student has surpassed a set grade point level in Lime courses. Or, courses that do not fall into any specific order in relation to other offered courses, but for which the difficulty of the content or the targets of learning are set at a high level.
- 4 Ivory Courses related to teacher, etc., qualification.

Course registrants include non-regular students (non-degree students, special auditing students, and Japanese Studies students). However, auditing students are excluded.

Undergraduate teacher-training, special courses for foreign students, related courses, etc.

*Only class subjects with more than 10 registered students are indicated.

* 1 The Color Code Numbering (CCN) system indicates the positioning in the curriculum structure and the level in light of educational goals, through a numeric code CCN and by color.

As indicated below, the first digit indicates differences in the positioning of the course and the content level.

- 0 White Core courses that do not fall into any specific order in relation to other courses, and certified courses through units that have already been earned or transfer of credits, etc.
- 1 Sakura Courses in the curriculum structure that are best to take first, from the standpoint of the overall order of study. Or, courses that do not fall into any specific order in relation to other offered courses, but for which the difficulty of the content or the targets of learning are set at a relatively low level.
- 2 Lime Courses in the curriculum structure that are best to take after color code Sakura courses, from the standpoint of the overall order of study. Or, courses that do not fall into any specific order in relation to other offered courses, but for which the difficulty of the content or the targets of learning are set at a somewhat high level.
- 3 Carmine Courses that are best to take after color code Lime courses, from the standpoint of the overall order of study. Or, courses that can be taken if the student has surpassed a set grade point level in Lime courses. Or, courses that do not fall into any specific order in relation to other offered courses, but for which the difficulty of the content or the targets of learning are set at a high level.
- 4 Ivory Courses related to teacher, etc., qualification.
